USER MANUAL

**Read The Operating Instructions Carefully Before Use**

Electronic cigarettes and their parts are used to vaporize liquids for the consumption of vapor through a nozzle. Depending on the liquid used, they can contain nicotine, propylene glycol, glycerol, flavorings, and other substances. Nicotine is a stimulant, which, in large amounts, can cause health problems such as nicotine, people's physical, glycerol, aldehydes, and other substances. These substances can cause irritation to the lungs, mouth or throat as well as for people with a history of heart disease, stroke, or respiratory problems.

Check use carefully if problems, colds, coughs and irritation occur. If you experience any of these symptoms, stop using the electronic cigarette. Its components and liquids out of the body can cause damage to the body. Do not touch the electronic cigarette and its components from the influence of heat or radiation or direct sunlight.

Inhalation of steam is not recommended for young people, non-smokers, pregnant women, and people with a history of lung, heart, mouth or throat as well as for people with a history of heart disease, stroke, or respiratory problems.

Keep the electronic cigarette, its components and liquids out of the body. Do not touch the electronic cigarette and its components from the influence of heat or radiation or direct sunlight.

Do not swallow liquid containing nicotine and liquids without nicotine. Nicotine is a stimulant, which, in large amounts, can cause health problems such as nicotine, people's physical, glycerol, aldehydes, and other substances. These substances can cause irritation to the lungs, mouth or throat as well as for people with a history of heart disease, stroke, or respiratory problems.

Rinse the mouth repeatedly with water and spit out the rinse liquid. Consult a doctor immediately. Swallowing liquid containing nicotine and liquids without nicotine. Nicotine is a stimulant, which, in large amounts, can cause health problems such as nicotine, people's physical, glycerol, aldehydes, and other substances. These substances can cause irritation to the lungs, mouth or throat as well as for people with a history of heart disease, stroke, or respiratory problems.

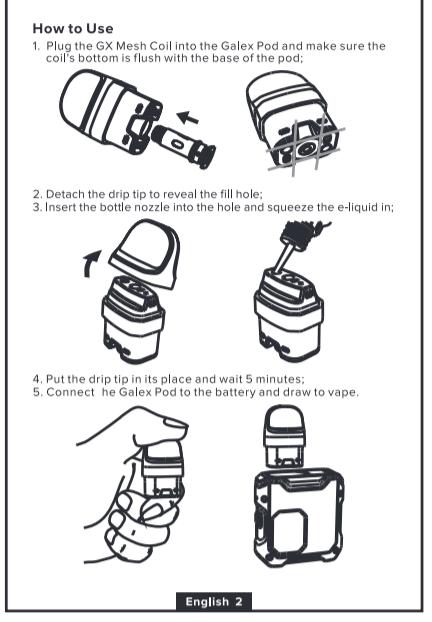

Top Off Design: ISO 8317 Child Resistant Certificate, super easy top off.

USB Type-C Port

**Highlight**

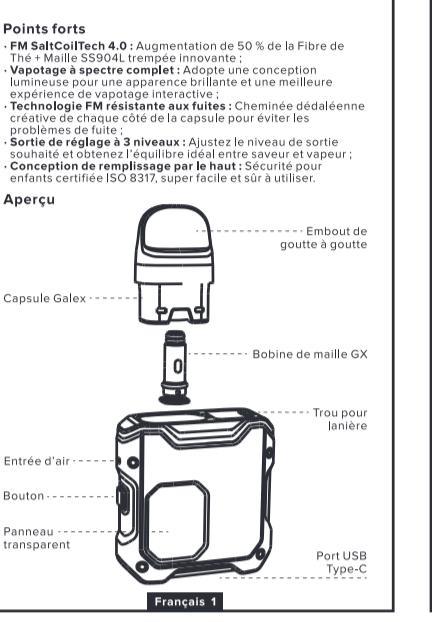

- FM SelfTech 4.0: 50% increase in the Tea Fiber + innovative dimensions 559044-Nano.
- Full Spectrum Vaping: Adopt the design for a shining smoke, and the taste is more like smoking.
- FM Leak-Resistant Tech: Creative labyrinthine design, leak-proof, no leaking.
- 3-Level Adjustment: Adjust your desired output level (low, middle, high) of flavor and vapor.
- Top Off Design: ISO 8317 Child Resistant Certificate, super easy top off.

Specifications			
Coil Resistance:	0.81Ω/0.00	Pod Capacity:	2ml
Output Voltage:	11-22W	Output Voltage:	3.3V-3.5V-4.2V
Battery Capacity:	800mAh	Material:	Zinc Alloy, PCTG
Dimensions:	53.19*76.86mm		

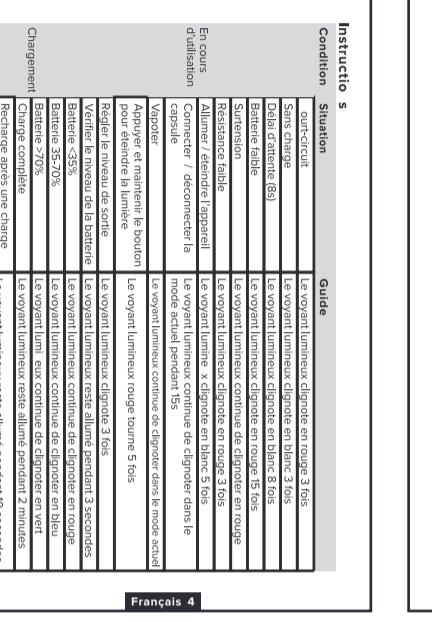

Attention		
1. Wait 5 minutes after filling to make sure the coil is fully saturated before using for the first time.		
2. Refill the pod when e-liquid is nearly used up to avoid dry-burn.		
3. Do not fill too much e-liquid.		
4. Do not overheat the coil.		
5. Do not block the air inlet to prevent poor air flow.		
6. Please charge the device with a recommended adapter and USB cable.		
7. If kept unused for a long time, the pod and battery should be stored separately.		

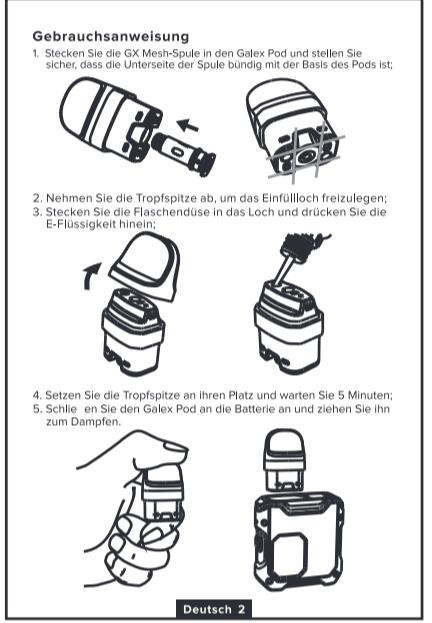

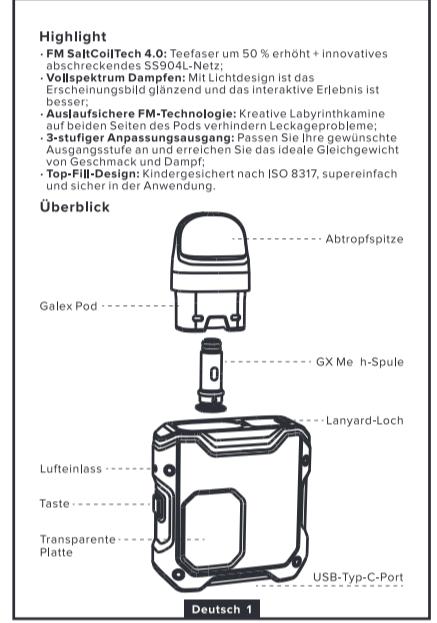

Comment utiliser		
1. Insérer la bobine de malla GX dans la capsule Galex et assurer que la fente de la bobine efface la base de la capsule.		
2. Dévisser l'embout pour révéler le trou de remplissage.		
3. Insérer la buse du flacon dans le trou et presser l'e-liquide dedans.		
4. Mettre l'embout à sa place et attendre 5 minutes.		
5. Connectez la capsule Galex à la batterie et tirez l'énergie.		

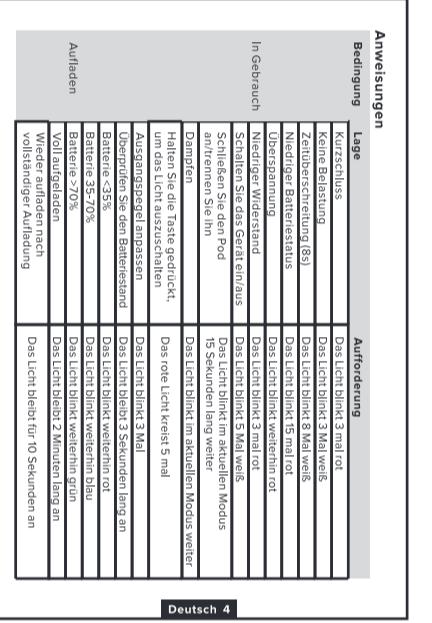

Spécifications			
Résistance de la bobine:	0.81Ω/0.00	Capacité de la capsule:	2ml
Pod Capacité:	2ml	Prise de courant de la capsule:	11-22W
Tension de sortie:	3.3V-3.5V-4.2V	Prise de sortie de la capsule:	3.3V-3.5V-4.2V
Capacité de la batterie:	800mAh	Matériel:	Alliage de Zinc, PCTG
Dimensions:	53.19*76.86mm		

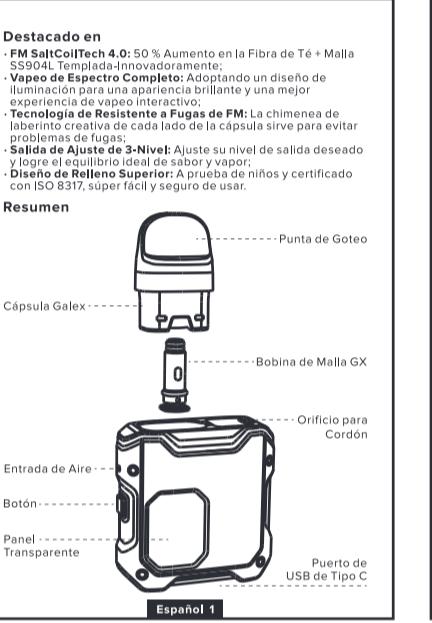

Attention		
1. Attendre 5 minutes après la recharge pour assurer que la bobine est complètement sèche avant de la utiliser.		
2. Remplir la capsule lorsque l'e-liquide est presque épuisé pour éviter la combustion à sec.		
3. Ne pas souffler de l'air dans l'embout.		
4. Une mauvaise circulation de l'air peut entraîner l'utilisation pour éviter la décharge de l'appareil.		
5. Veiller à toujours charger l'appareil avec l'adaptateur recommandé et le câble de USB avec une corrente de charge de 2A.		
6. Si l'appareil n'est pas utilisé pendant une longue période, laisser la capsule et la batterie séparées.		

Spezifikationen			
Pod-Kapazität:	2ml	Bobine:	0.81Ω/0.00
Ausgabegerät:	11-22W	Spannung:	3.3V-3.5V-4.2V
Ausgangsspannung:	800mAh	Material:	Zink-Legierung, PCTG
Größe:	53.19*76.86mm		

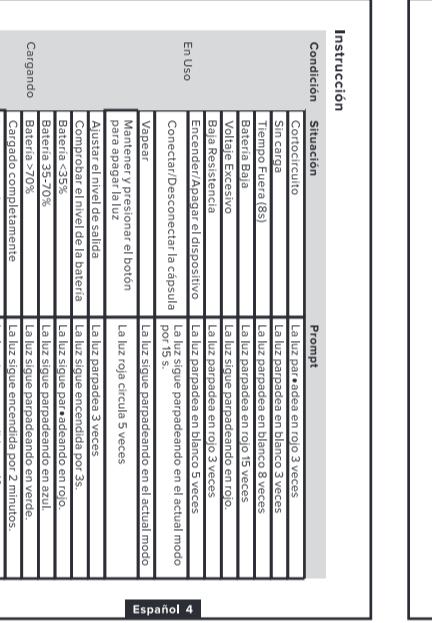

Aufmerksamkeit		
1. Warten Sie nach dem Aufladen 5 Minuten, um sicherzustellen, dass die Bobine vollständig getrocknet ist, bevor Sie sie wieder verwenden.		
2. Füllen Sie die Kappe, wenn das E-Liquid fast aufgebraucht ist, um ein Trockenbrennen zu verhindern;		
3. Stellen Sie keine Luft in die Tröpfchenseite;		
4. Bitte stellen Sie sicher, dass es keinen schlechten Luftrhythmus nicht, um einen schlechten Luftrhythmus zu verhindern;		
5. Bitte verwenden Sie eine geeignete Ladekabel und USB-Kabel mit einem Ladestrom von 8V-800mA;		
6. Bei längerem Nichtbenutzung sollten Pod und Akku separat gelagert werden.		

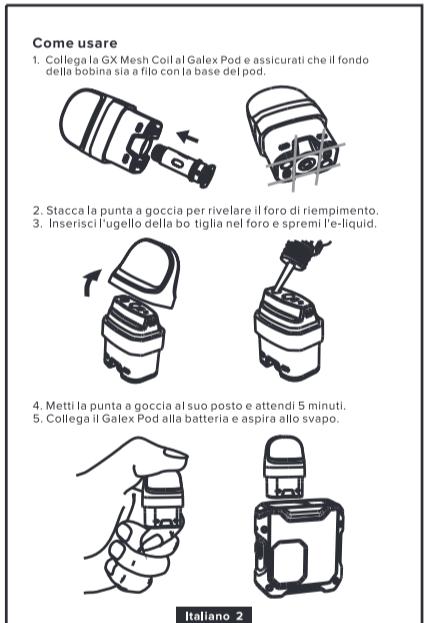

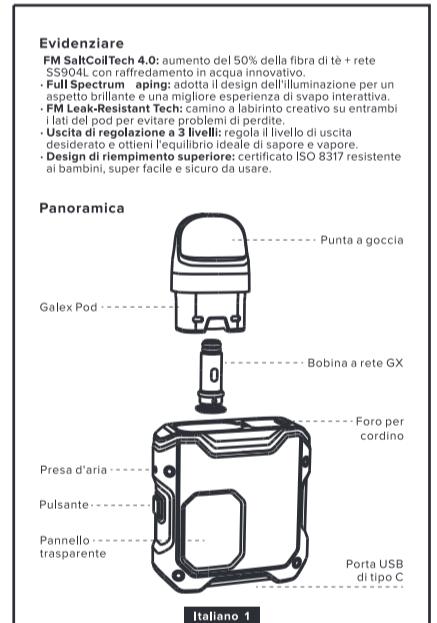

Como Utilizar		
1. Conecte la Bobina de Malla GX en la Capsula Galex, y asegure que la parte inferior de la bobina esté alineada con la base de la capsula.		
2. Desconecte la punta de goteo para revelar el orificio de llenado.		
3. Inserte la boquilla del frasco en el orificio, y señale el e-liquido;		
4. Ponga la punta de goteo en su lugar y espere por 5 minutos;		
5. Conecte la capsula galex a la bateria y tire de la energía p-a-veapear.		

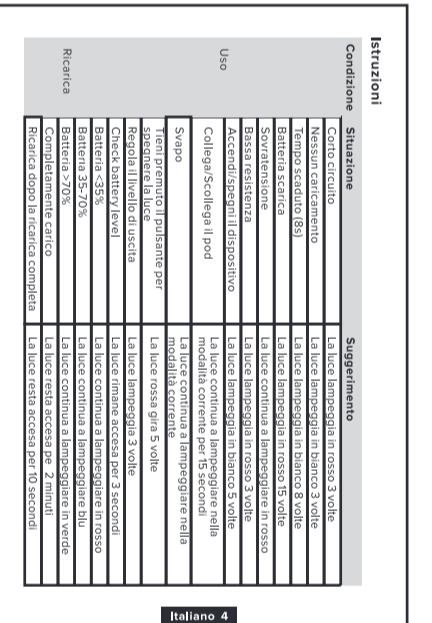

Especificaciones			
Capacidad de la Cápsula:	2ml	Resistencia de la Bobina:	0.81Ω/0.00
Pod Capacity:	2ml	Prise de courant de la Cápsula:	11-22W
Voltaje de Salida:	3.3V-3.5V-4.2V	Prise de sortie de la Cápsula:	3.3V-3.5V-4.2V
Capacidad de la Batería:	800mAh	Material:	Aluminio de Zinc, PCTG
Dimensiones:	53.19*76.86mm		

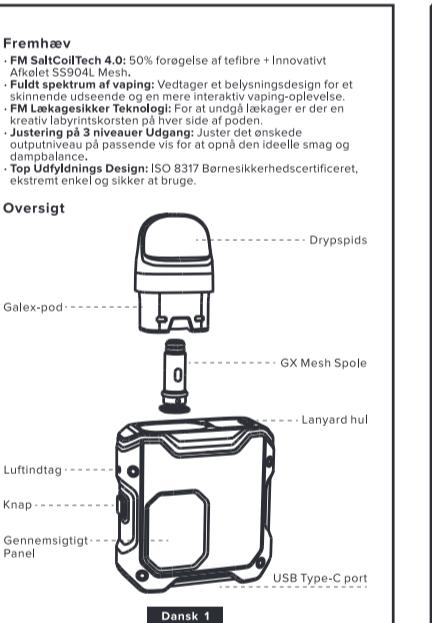

Atención		
1. Esperar por 5 minutos después del llenado para que la bobina esté completamente seca antes de usarla.		
2. Llenar la cápsula cuando el liquido esté casi agotado para evitar que se queme seco.		
3. No soplar aire en la punta de goteo;		
4. No soplar aire en la punta de goteo;		
5. Un dispositivo de apagado automático, no bloquee la entrada de aire durante el uso.		
6. Opcionalmente cargar mediante el adaptador recomendado y el cable de USB con una corriente de carga de 2A.		
7. Si no se usa por un largo periodo de tiempo, la cápsula y la batería deben guardarse separadamente.		

Specifiche			
Capacità di pod:	2ml	Resistenza della bobina:	0.81Ω/0.00
Prise di corrente:	11-22W	Tensione di uscita:	3.3V-3.5V-4.2V
Capacità della batteria:	800 mAh	Legge di potenza: PCTG	
Dimensioni:	53.19*76.86mm		

Attenzione		
1. Attendere 5 minuti dopo il riempimento per assicurarsi che la bobina sia completamente asciutta prima di utilizzarla.		
2. Rifornire la capsula quando il liquido è quasi esaurito per evitare la combustione secca.		
3. Non soffiare aria nella punta a goccia.		
4. Non soffiare aria nella punta a goccia per evitare uno scarso flusso d'aria.		
5. Usare un caricabatterie e un cavo USB consigliati.		
6. Per un uso prolungato, si consiglia di pulire il dispositivo.		
7. Evitare di utilizzare liquidi contenenti nichel, sali di zinco e altri elementi tossici.		

Sådan bruges		
1. Instal la GX Mesh pod en el Galex Pod, solo spoleo bund flugter med poden.		
2. Tag opsløsningen af den øverste påfyldningshulset.
